ABOUT ME

I'm a full-stack software developer currently working remotely with an emphasis on front end web development. With two years of experience in small and large companies, my love of coding has grown from an interest to a full-fledged passion. Now I'm focused on working with teams to build quality technology and expanding my programming knowledge at every opportunity.

RECENT PROJECTS

🔗 Rich Pulse

React, Redux, Tailwind CSS

Concept "Rich List" dashboard site. Experimenting with data visualisation using Chart.js and React Table. Styled with responsive TailwindCSS.

🔗 Hiit Workout Generator

React, Redux, Tailwind CSS

App that creates a list of random exercises and provides a countdown timer with sounds. Built using Redux to keep fit while the gyms are closed for COVID-19.

🔗 Stoic Wisdom

PostgreSQL, Express, React, Node, TailwindCSS

Website and API that showcases quotes from the great stoic thinkers. Additional features include natural language processing, full-text search, and Mailgun integration.

PROFESSIONAL EXPERIENCE

Junior Front End Developer

Vodafone UK

📅 Jan 2021 – Ongoing   📍 London/Remote

Building the eCare Reinvent Vertical in React as part of the UK Web Engineering team. Collaborating with large teams using agile/scrum workflow, and conducting rigorous testing and reviews of all code.
